

FOR MY BEAUTY PRACTITIONER

5 points about psoriatic disease to help you understand me

it is a chronic condition that has flare-ups & remissions

it can be treated but not cured

most people don't understand this condition

it affects more than my skin

it is not infectious

PRACTICAL TIPS

I am possibly: anxious,
self-conscious & cautious

Please be

kind, compassionate and empathetic

Gentle with my skin as it can be painful

Don't use very hot water, rather luke warm water

Consider seating me in a quiet place in the salon

The skin flakes may be messy but easily swept up

Psoriasis is NOT contagious
